

[illegible]

A diagram showing a cross-section of a roof and wall assembly. The roof is sloped downwards from left to right. It consists of a thick brown structural layer (rafters or joists) and a thinner grey layer (roofing material) on top. A white gutter is attached to the bottom edge of the roof. Below the roof, a vertical orange wall is shown. The gutter is positioned to collect water from the roof and direct it away from the wall.

[illegible]
